MOTIVATION

Let's find our direction

We hired a professional lecturer from the LEAF organization to give a motivational workshop for the 9th-grade students. He provided them with the necessary information and did a lot of activities that could help them choose a high school right for them. They learned how to focus on their goal and what steps to take or methods to use when they want to achieve the goal.

They learned how to focus on their goal and what steps to take or methods to use when they want to achieve the goal.

MOTIVATIONAL POSTERS

Students collected motivational quotes in English. They discussed their meaning and validity with their teachers and classmates. Then students created motivational posters using the technique of collage. We displayed the posters in school lobby.

TIME MANAGEMENT

How to manage your time?

We prepared a presentation and a Kahoot about Time management for students of 7th-9th grade. They learned what time management is and a couple of simple steps that can help them to use time effectively.

Some pupils created their Time-squared diagrams in their Math lessons.

The kids also did several time management activities and games individually or in teams during their PE lessons because we wanted to use the ample room of the school gym and make the activities more interactive and engaging.

the team with better time management wins
